

## Lab 4

### Ccn

Below is my code execution

```
~/cnn$ ././~/cnn$ ./client.c
bash: ./client.c: Permission denied
~/cnn$ ./client
Socket successfully created..
connection with the server failed...
~/cnn$ ./server
Socket successfully created..
Socket successfully binded..
Server listening..
server accept the client...
From client: p
    To client : t
From client: v
    To client : Hello
From client: exit
    To client : exit
Server Exit...
~/cnn$
```

```
~/cnn$ ~/cnn$ ./client
Socket successfully created..
connected to the server..
Enter the string : p
From Server : t
Enter the string : v
From Server : Hello
Enter the string : exit
From Server : exit
Client Exit...
~/cnn$
```

Got it to kinda work, screenshot shows. Thanks for the good semester have a great summer!
